TESTS FOR DETERMINING THE HEAT OF DECOMPOSITION OF MINERALS. [1962] 16p. 5 refs.
Order from SLA $1.60

Trans. of Acta Geologica (Hungary) 1958, v. 5, p. 187-195.

DESCRIPTORS: *Minerals, Decomposition, Pyrolysis, Test methods, Bonding, Calorimetry.

A determination of the heat of decomposition of various minerals was carried out by differential thermal analysis, as well as by means of a microcalorimeter specially designed for this purpose. A theoretical agreement was sought between the respective results obtained by these two methods, and a reciprocal conversion of the results of the two series was attempted. We hope that further development of our calorimetric results will permit us to determine the bonding force of the OH-radicals of the minerals. (Author)
